

# Septi - Clean™

## Instant Hand Antiseptic

Instant Hand & Skin Disinfectant in Just 15 Seconds your Hands get Disinfected  
**Germicidal - Virucidal - Bactericidal - Fungicidal**

### HAND STERILIZING RESULTS

BEFORE

AFTER

Septi-clean is the fastest acting, Hand Disinfectant to protect you from all known bacteria & Viruses. An exceptionally effective and mild de-germing product that supplements regular hand washing. In a few seconds Septi-clean helps break the link between hand and germs, and helps reduce the risk of infections.

A small amount of Septi-clean about 2 - 3 ml rubbed evenly over the hands kills 99.5% of germs virtually on contact. Septi-clean should be used regularly to help keep bacteria level low throughout the shift.

Only 2-3ml rubbed for 15 sec. gives protection for 3 hours.

What separate Septi-clean from the competition against liquid hand disinfectant, is the gel phase of its manufacturing. By a unique process, the product is given a gel like texture which acts as a protection barrier.

The benefit is that this gives the active germ killing ingredient longer contact time with the skin. Because of the gel, it actually acts as an emollient. This means that it softens the skin like a moisturizer. This enhances safety & skin softening effect. The gel ingredient actually absorbs into the deep skin layer providing as a barrier to bacteria while the alcohol evaporates.

### US Pharmacopeia & National formulary register recommend ethyl alcohol based skin disinfectant :-

- As an effective antimicrobial handscrub in all applications.
- To decrease germs in minor cuts.
- For disinfectory skin preparation prior to surgery.
- As an effective handwash for general health care by personnel involved in food handling, food preparation etc.
- Applied externally for cooling soothing application for bedridden patients athletes.
- Septi-Clean is more effective than Propanol based dis-infectant.

**NO STICKY FEELING AND NO BACTERIA ON THE HAND**
