

POWER COLUMN

Power Column samples the organization of medical service equipment in one aesthetically appealing vertical headwall. It is a modular designed Product to provide a clean, sanitary and ordered environment. Furthermore it can enhance the quality in care and medical environment. Due to its systematized design, a network provided for medical care service is applicable to the use of secondary instruments and assemblies. The main structure consists of fluorescent panel, aluminum component and side track. Also includes power lines and medical gas piping. Side tracks are installed at four at angles, and the length is equal to the column. All the assemblies required by medical care personnel can be easily and securely placed on the side track of this column. Applications in mid to acute level environment
